

Put a face on your exploration project. Give your data meaning!

3D Drill Tours explain the meaning of your drill results using rich 3D animations and professional voiceover talent.

Appreciate the impact with investors: Suddenly investors can evaluate the millions of dollars invested in your drilling programs in terms they really understand.

resourceINTELLIGENCE takes your raw drill data and creates a 3D colour image of the project dramatically showing the cut-off grades for each commodity. As the tour progresses, the narrator

explains your location, the value of your infrastructure, and the dimensions of your project.

Is the project open at depth? How deep have you drilled? What is the NI 43-101 mineral resource estimate? What are your future exploration plans? *Drill Tour explains it all and gets it "word perfect" every time.*

Distribution is Key

resourceINTELLIGENCE distributes your Drill Tour to investors. Your story does the rest.

To generate more investor interest, your Drill Tour is accompanied by a written story and posted throughout our network of affiliate websites.

This includes resourceINTELLIGENCE.net. (120,000+ hits monthly) plus other investor websites with traffic totalling another 1,000,000 investors monthly. See our handout "resourceINTELLIGENCE Affiliate Network" for a complete list of websites included.

Timing

News matters. Drill results can mean millions in market cap, and dramatically impact on financings. Timing is critical. Now in your press release your DRILL TOUR animation can be embedded and sent globally and opened anywhere in the world. Then it

DRILL TOUR

Leverage your
DRILL RESULTS

resourceINTELLIGENCE.NET
the world leader in mining media and technology

will be included in your resourceINTELLIGENCE Profile, and linked to your website.

The Process

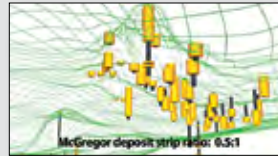

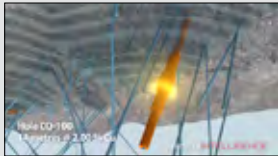

We ask our clients to supply the drill data in Excel or CSV format, plus related maps and a logo. We write the script. You approve it. Within 14 days the project will be completed.

You maintain control of the animation's content each step of the way. Here's how it works:

- ### 1 Send data, maps & logo...

- ### 2 Approve the script...

- ### 3 Send any requested edits!

Pricing

Drill Tour starts at \$8,500 and includes one project with up to 3 project areas. Drill holes and down hole mineralization are included.

Drill Tour Plus

There is literally no limit to what we can do with a Drill Tour. Add infrastructure, trucks, ore bodies, pit designs and much more.

Contact one of our sales reps today for a free consultation for your projects.
